Which Power Inverter should I buy?

The Halfords 200W Power Inverter is the perfect glovebox companion, and ideal for those who travel for business. If you do need that extra wattage, then the Streetwize P70061 is hard to beat. It's a great choice if you go camping regularly. The Sealey PS1300 is also excellent, but pricey.

How many Watts Does a power inverter use?

Can a power inverter power a car?

Whether it's an emergency recharge for your laptop, the need to power a hand-held tool outdoors, or the convenience of a temporary energy supply on a camping weekend, being able to convert your car's 12-volt DC electricity to a part-time 240-volt AC supply can be really handy. That's where a power inverter comes in useful.

How much power does a Streetwize inverter have?

For a modest outlay, the Streetwize inverter packs an impressive punch. It offers 800W of constant power, but its ability to reach a 1600W peak output means you can run more powerful appliances than any of its rivals here – the peak output will even allow you to heat up a kettle, providing you don't use a fast-boil one.
