

PDEOZE PowerContainer

3kw inverter volume

Overview

What is a 3KW inverter?

Sale! 3kw inverter with a wall mountable lithium battery to keep lights on and family happy, entertainment and wifi guaranteed to keep going for 4hrs. The system will keep your Security lights, cctv and electric fence active for your safety. Can run kettle or microwave as well but remember its just for back up.

How much power does a 3 kW inverter draw?

A 3 kW inverter with 85% efficiency would draw 3450 W from the DC battery (ie. 288 A @ 12 V; 144 A @ 24 V) at high load.

What makes a true sine wave inverter?

The design criteria have been to produce a true sine wave inverter with optimised efficiency but without compromise in performance. Employing hybrid HF technology, the result is a top quality product with compact dimensions, light in weight and capable of supplying power, problem free, to any load.

How many kW / 18 Kva is a 24/3000 unit?

Six 24/3000 units, for example, will provide 15 kW / 18 kVA output power. Operation in 3-phase or split phase configuration is also possible. If an automatic transfer switch is required we recommend using the MultiPlus inverter/charger instead. The switch is included in these products and the charger function of the MultiPlus can be disabled.

How do I connect my mk3-usb inverter to my PC?

These larger inverter models come with a VE.Bus port. All you need to connect to your PC is our MK3-USB VE.Bus to USB interface (see under accessories). Together with our VictronConnect or VEConfigure software, which can be downloaded free of charge from our website, parameters of the inverters can be customized.

How many inverters can be used in parallel?

Up to 6 units inverters can operate in parallel to achieve higher power output. Six 24/3000 units, for example, will provide 15 kW / 18 kVA output power. Operation in 3-phase or split phase configuration is also possible. If an automatic transfer switch is required we recommend using the MultiPlus inverter/charger instead.
