

PDEOZE PowerContainer

75 degree lithium iron phosphate battery station cabinet weight

Overview

What is a lithium ion battery storage cabinet?

Our Lithium Ion Battery Storage Cabinet LBSC-A10 is designed for secure storage of lithium-ion batteries in labs, workshops, and small industrial units, offering fireproof protection in compact spaces. Labtron Lithium Ion Battery Storage Cabinets are engineered for secure storage and controlled battery charging environments.

What is a lpsc-a10 battery storage cabinet?

Labtron is a leading supplier of the Lithium Ion Battery Storage Cabinet. The LBSC-A10 features an 18 L sump, five shelves supporting 75 kg each, and DN75 air ducts, ideal for secure battery storage.

What are labtron lithium ion battery storage cabinets?

Labtron Lithium Ion Battery Storage Cabinets are engineered for secure storage and controlled battery charging environments. These cabinets feature self-closing, oil-damped doors and triple hinges for maximum structural endurance. They are constructed with a powder-coated steel body and integrated leak-proof sump for safe containment.

How much weight can a dn75 cabinet hold?

It includes five durable shelves, each designed to support up to 75 kg of weight. These cabinets support DN75 extraction air ducts to remove hazardous vapors during battery charging cycles. They feature single-wing doors with oil-damped closers for enhanced fire protection in emergencies.

How long does a lithium phosphate cell last?

- Cells with up to 12,000 cycles.
- Lifespan of over 5 years; payback within 3 years.
- Intelligent Liquid Cooling, maintaining a temperature difference of less than 2°C within the pack, increasing system lifespan by 30%.
- High-stability lithium iron phosphate cells.
- Three-level fire protection linkage of

Pack+system+water (optional).
