Overview

What is a Chint portable energy storage power supply?

CHINT's portable energy storage power supply uses automotive-grade lithium iron phosphate cells, offering high capacity and fast charging. It supports a 1200W pure sine wave output, has six interfaces that can support nine devices simultaneously, and has passed stringent safety and reliability tests to ensure worry-free electricity usage.

Why is portable energy storage so important?

In the U.S., there is high demand for portable energy storage due to outdoor self-driving camping needs. Japan, with its frequent earthquakes, has more regular household storage needs. Meanwhile, Europe is caught in an energy crisis, increasing the demand for home solutions for continuous power outages.

Are portable power supply devices safe?

The safety of portable power supply devices is crucial. Outdoors, bumps, collisions, sun exposure, and rain occur often, which may pose safety risks such as power short circuits, spontaneous combustion, and explosions.
