BAKU, March 27, 2025 —The World Bank today approved the Azerbaijan Scaling-Up Renewable Energy Project (AZURE), an initiative that will strengthen Azerbaijan's power transmission network, enable the country to diversify its energy mix, and meet growing electricity demand through a more resilient.

Azerbaijan and Georgia aim to generate renewable electricity and send it under a 1,200-km stretch of the Black Sea to Romania and Hungary. Azerbaijan next week will garner much of the attention of the climate tech world, and not just because it will host COP29, the United Nation's giant annual.

Today, Azerbaijan boasts the most powerful electric power system in the South Caucasus. It is anchored by 22 large thermal power plants and more than 30 hydroelectric stations of varying capacities, most of which are operated by the state-owned company AzerEnergy OJSC. According to Yusif Garayev.
