Base station equipment of Sao Tome and Principe telecommunications operator

Overview

Does so Tomé & Príncipe use satellite?

São Tomé and Príncipe relied on satellite for international Internet connectivity until the arrival of the ACE undersea fibre-optic cable in 2012. STP Cable was established as a public-private partnership to manage the country's holdings in ACE with the goal of open access and cost-based wholesale costs.

Does so Tomé & Príncipe have a microwave link?

A high-capacity microwave connection was deployed between the islands of São Tomé and Príncipe in 2015. The transmission link covers 176 km, one of the longest microwave routes in the world, and provides 300 Mbit/s of capacity, more than nine times the previous link.

What is the 3/2004 base law of telecommunications?

The 3/2004 Base Law of Telecommunications guides the Authority's activities for that sector. The Authority is also responsible for managing the universal service fund and providing technical assistance for the transition to digital broadcasting.
