

PDEOZE PowerContainer

Bosnia and Herzegovina Energy Storage Container Northwest

Overview

Does Bosnia and Herzegovina need a hydropower plant?

Hydropower has historically been the dominant renewable energy source in Bosnia and Herzegovina, and several hydropower plants are in operation. The country has been exploring opportunities to expand its hydropower capacity, but such projects can face environmental and social challenges.

How is energy used in Bosnia and Herzegovina?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

What is Bosnia & Herzegovina's national Environmental Action Plan?

Bosnia and Herzegovina adopted a National Environmental Action Plan, which provides action path to address the major environmental issues of the country. In the energy sector the target will be achieved by increasing energy efficiency and usage of renewables.

Does Bosnia & Herzegovina need to transition from coal to renewables?

As: Bosnia and Herzegovina has traditionally relied heavily on coal for electricity generation. Transitioning away from coal to renewables poses economic and social challenges, especially in regions where the coal industry is a significant employer.

What if Bosnia & Herzegovina used its technical potential?

As we can see, if Bosnia and Herzegovina would use its entire technical potential, it would increase the generating power by 390%, and would become one of the key net exporters of the WB6. Greenhouse gas emissions in Bosnia and Herzegovina are (for 2018) around 27,44 million tons of CO₂ equivalent.

What is a feed-in tariff in Bosnia & Herzegovina?

In the Federation of Bosnia and Herzegovina, the main support scheme for the production of electricity from renewable energy sources is a feed- in tariff, regulated by the RES Law FBiH and special Decrees and Rulebooks.
