Cambodia s solar power generation and energy storage requirements

Overview

Cambodia's solar energy growth story is no longer a dream—it's unfolding rapidly. With a clear target of 7% solar by 2025, progressive policy shifts, and strong financial innovation, the Kingdom is proving that it's ready to lead the way in Southeast Asia's green transition.

Cambodia's solar energy growth story is no longer a dream—it's unfolding rapidly. With a clear target of 7% solar by 2025, progressive policy shifts, and strong financial innovation, the Kingdom is proving that it's ready to lead the way in Southeast Asia's green transition.

Phnom Penh, Cambodia — Cambodia is on track to significantly boost its solar energy share, with new figures projecting solar to make up 7% of the country's electricity supply by 2025. This equates to a total installed capacity of 530.14 megawatts (MW) —a major leap from 3.2% in 2023 and 4.6% in.

The Ministry of Mines and Energy (MME) has announced a new set of “Updated Principles for Permitting the Use of Rooftop Solar Power in Cambodia” under Prakas No. 0312, replacing the earlier Prakas No. 0159 issued in 2023. Released on 18 November 2024, the updated principles categorise rooftop solar.

According to TrendForce, Cambodia is accelerating the development of clean energy to reduce its reliance on imported energy, enhance the country's energy security, ensure reliable and affordable power supply, and help this Southeast Asian nation achieve its goal of having at least 70% clean energy.

Cambodia is set to significantly boost its solar energy capacity to 7% of its total electricity supply by 2025. According to the Electricity Authority of Cambodia (EAC), the country plans to generate 1.06 billion kilowatt-hours (kWh) of solar power—a notable increase from the current 0.62 billion.

In early 2025, the Minister of Mines and Energy, Keo Rottanak, announced a new policy to prohibit the import of energy-inefficient appliances, such as outdated air conditioners and incandescent light bulbs. This initiative aims to save 1,500 megawatts of electricity by 2030, equivalent to over 50%.

Cambodia's current installed solar capacity is slightly over 400 MW, but the country is targeting 3.1 GW by 2040. This projected growth in solar power production reflects not only ongoing technological advancements but also a growing recognition of Cambodia's vast solar energy potential. Only a. How many solar projects does Cambodia approve?

Cambodia approves 23 power sector projects, including 2 energy storage plants, 12 solar projects. - EnergyTrend Cambodia approves 23 power sector projects, including 2 energy storage plants, 12 solar projects.

How many energy projects are coming to Cambodia?

The Cambodian Cabinet approved four energy projects this past April, a US\$231 million hydroelectric power and three solar power projects with a combined, rated, maximum power capacity of 140 MW. The latter are expected to come online and dispatch power to the national grid by 2020 and 2021 in four different provinces.

How many solar power plants are there in Cambodia?

Just two solar power plants are up and running in Cambodia at present, one a 10-MW plant developed by Singapore's Sunseap and another, 60-MW facility in Kampong Speu. Cambodia consumed a total of 2,650 megawatts of electricity in 2018, an increase of about 15% compared to 2017, according to the Ministry of Mines and Energy.

How much solar power does Phnom Penh need?

Phnom Penh needs some 400 megawatts. We will increase the energy generation capacity by coal-fired power plants," the Premier was quoted in news reports. Solar power capacity has been on a sharp ascent in Cambodia recently, increasing at a 10% annual rate from less than 1% of national generation capacity, however.

How much electricity does Cambodia use?

Cambodia consumed a total of 2,650 megawatts of electricity in 2018, an increase of about 15% compared to 2017, according to the Ministry of Mines and Energy. Eighty-three percent of rural areas had access to grid power as of the most recent, publicly disclosed figures, leaving nearly 5 million Cambodians without access to electricity.

How much does solar energy cost in Cambodia?

One of the promising traits of solar energy in Cambodia is its cost. The average electricity price for solar power is around USD 0.03 per kW, significantly lower than that of coal, which is USD 7.7 per kW.
