Current Inverter Mounting Considerations  
Ideal Roof-Mounting Practices  
O& M Perspective  
When installers choose to put inverters on the roof, the next step is finding the best possible mounting spot. When the 10-ft rule doesn't need to be followed, Standard Solar prioritizes a shaded, north-facing spot on a vertical wall or parapet. The company prefers to bank the inverters in one spot for ease of maintenance. If a vertical wall isn't See more on [solarpowerworldonline](#) [Reddit](#)
