

## **PDEOZE PowerContainer**

# **Container office with solar energy**

## Overview

---

A solar panel on a shipping container project integrates photovoltaic (PV) technology into standard shipping containers. These units function as self-powered mobile offices or workspaces. What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.

How much solar can a 20 foot container hold?

20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future. We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount.

What is a modular container office?

Compared to traditional office spaces, modular container offices generally have lower upfront costs. Additionally, their energy-efficient designs help reduce ongoing expenses, making them a cost-effective solution for budget-conscious businesses. Quick Setup: Modular container offices can be delivered and assembled quickly, often within days.

How many watts can a RPS container hold?

RPS packages up your shipping container with all of your batteries, power components, mounting etc. safety tucked away inside the container itself. 20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future.

Why should you choose a container office?

**Flexibility and Portability:** The modular nature of these offices allows for easy relocation and reconfiguration. If a project moves to a different site, the office can be transported along with it, ensuring continuity in operations.

**Customisation Options:** Businesses can tailor their container offices to meet specific needs.

Which battery bank should I choose for the Instant off-grid containers?

Choose between a GEL Deep Cycle Sealed Lead Acid battery bank or a next-gen Lithium Iron bank. See below for more details and pictures. Pre-configured by RPS engineers. 370W solar panels power the Instant Off-Grid Containers. Each panel measures 69.1"×40.9"×1.4".
