

## **PDEOZE PowerContainer**

# **Costa Rica user-side energy storage power station**

## Overview

---

Is Costa Rica a sustainable country?

In Costa Rica, sustainability is a way of life. The country has long been a pioneer in protecting its plentiful natural resources, including its biodiverse cloud forests and rainforests, golden and black sand beaches, and active volcanoes' vibrant ecosystems. Today, it's on a mission to become the first carbon neutral country on the planet.

What is Costa Rica's goal?

Costa Rica's goal is to transfer 70 percent of public buses and taxis to clear air alternatives, like electricity, by 2035, and make them entirely emission-free by 2050. The National Decarbonization Plan also includes initiatives to develop integrated, low greenhouse gas emission systems to collect, separate, reuse and dispose of waste by 2025.

Why is ecotourism important in Costa Rica?

Ecotourism is an essential aspect of Costa Rica's sustainability initiatives. In fact, according to the country's tourism board, nearly two-thirds of the three million people that visit Costa Rica every year do so because of its natural offerings.
