Croatia solar curtain wall customization

Overview

What is a photovoltaic curtain wall?

Building Integrated Photovoltaics At Onyx Solar we provide tailor-made photovoltaic glass in terms of size, shape, transparency, and color for any curtain wall design. Photovoltaic curtain walls transform any building into a self-sufficient energy infrastructure and enhance the building's architectural design.

What is PV IGU curtain wall system?

PV IGU Curtain Wall System manufacturing with double or tripple glazed units for BIPV solar facade integration.

What is a curtain wall?

Curtain walling refers to a non-structural cladding system made from fabricated aluminum, commonly used on the outer walls of tall multi-storey buildings. This lightweight material offers ease of installation and can be customized to be glazed, opaque, or equipped with infill panels.

What is an all-in-one curtain wall system?

The all-in-one curtain wall system is an extra outer shell that not only improves the building's energy balance, but offers the fabric lasting protection from weathering. The SL Modular offers a wide range of options for custom balustrade design.

What are aluminum curtain walls?

The aluminum systems are not only easy to transport but also straightforward to manufacture. Curtain walls —also known as glass façades and exterior glazing systems —convert previously unused spaces into energy assets, enhancing both aesthetics and functionality.

What is a balcony curtain wall?

The combination of a fixed balustrade element with fully opening, insulated or non-insulated balcony glazing guarantees the perfect balcony aesthetic. Anyone who wants to take the opportunity to enhance the appearance and energy efficiency of an entire building during their balcony renovation will benefit from the curtain wall concept.
