Customized energy storage batteries for Ireland

Overview

Which battery energy storage systems are available in Ireland?

The Kylemore Battery Energy Storage System in Dublin went into operation in 2023 and has the capability of providing 30MW of fast-acting storage. The South Wall Battery Energy Storage System went live in 2023 and has the capability of providing 30MW of fast-acting energy storage.

How many MW of battery storage capacity are there in Ireland?

We currently have more than 300MWs of battery storage capacity in operation in Ireland, making it one of the largest battery portfolios in Europe. We plan to develop a pipeline of large scale battery projects, as well as additional renewable enabling technologies.

Can battery storage help reduce energy bills in Ireland?

As energy prices remain unpredictable and solar adoption continues to grow, Irish homeowners are turning to battery storage to maximise their energy independence. By storing excess solar power for use at night or during peak-rate hours, battery systems are helping thousands of homes cut electricity bills even further.

How can a battery energy storage system improve Ireland's power grid?

When the demand for electricity is high, the stored energy from a battery energy storage system can be released into the grid to help meet the demand. This can contribute towards reducing Ireland's reliance on fossil fuels and improving the stability of the power grid.

Where is Ireland's First 4-hour battery energy storage system located?

Co-located at Statkraft's Cushaling Wind Farm in Co Offaly, this project is Ireland's first 4-hour battery energy storage system. Located in Co Derry, construction of this project began in 2025. This project is one of four Synchronous Compensator projects currently being developed by Statkraft

Ireland.

Who built the first grid-scale battery in Ireland?

Statkraft built the first grid-scale battery in Ireland at Kilathmoy. This is an 11MW, 5.6MWh lithium-ion battery which commenced operation in April 2020. The battery is contracted to provide DS3 System Services to the Irish Transmission System Operator, EirGrid.

contracted to provide DS3 System Services to the Irish Transmission System Operator, EirGrid.

We transform second-life battery packs into vital energy storage units. What sets us apart is our commitment to sustainability, as we ingeniously repurpose battery packs from Irish Electric ...

We custom-fit every battery system based on your home's energy profile, no one-size-fits-all setups. Experience next-generation energy independence with battery storage systems ...

Eir Solus develops stand-alone battery storage systems as well as hybrid energy systems that link battery storage with wind and/or solar plants. Batteries are an important building block of the ...

We currently have more than 300MWs of battery storage capacity in operation in Ireland, making it one of the largest battery portfolios in Europe. We plan to develop a pipeline of large scale ...

We are proposing to use an iron-air battery capable of storing energy for up to 100 hours at around one-tenth the cost of lithium ion for our projects. This form of multi-day storage is made ...

Xerotech specializes in advanced battery systems, offering a wide range of lithium-ion battery packs and electrification systems tailored for automotive applications and energy storage.

We delivered a custom-built 90KVA/180KWh battery energy storage system for a Resolute Engineering project at a sports complex in Co. Kildare, Ireland. The system integrates ...

Across the island of Ireland, we provide market & trading-related products and services tailored to individual energy producers, flexible asset owners and investors, and corporates.

Aton power storage Ireland are pleased to offer a range of functional and stylish power storage units for home and commercial use. These can be powered by pv installation or direct from the ...

Ireland is an excellent starting point for RWE as we look to expand and grow our battery storage technology business and become a key partner in Ireland's low carbon energy transition.
