Cyprus Energy Storage Battery Planning

Overview

Does Cyprus have a battery energy storage system?

Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects in the Mediterranean island country. Cyprus Energy Regulatory Authority (CERA) announced the approval earlier this week (18 June) of three projects which will be owned and operated by the Cyprus Transmission System Operator (TSOC).

Will Cyprus install 400MWh battery energy storage system?

Image: Cyprus government / MECI. Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects in the Mediterranean island country.

How is Cyprus developing pumped hydro energy storage capacity?

The country is also seeking to develop pumped hydro energy storage (PHES) capacity with technical assistance from the European Commission (EC) and is formulating a National Hydrogen Strategy. Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects.

How many energy storage applications have been approved in Cyprus?

The Cyprus Energy Regulatory Authority (CERA) representatives reported establishing a regulatory framework for energy storage in 2019, followed by market rules approval in 2021. The Cyprus Transmission System Operator has received 13 storage applications totaling 224 megawatts capacity, with eight applications processed and five under review.

Why does Cyprus waste so much energy?

AKEL MP Costas Costa characterised Cyprus as "the only country in the world where thousands of megawatt-hours go unused due to lack of centralised green energy storage systems," adding: "During the day we waste megawatt-

hours because we lack storage, and at night we are one step away from blackouts.”.

Is Cyprus facing a unique set of energy challenges?

In a keynote address to open a conference on energy storage and hydrogen in March, George Papanastasiou of the Ministry of Energy, Commerce and Industry (MECI) noted that Cyprus faces a “unique set of energy challenges, which require tailored solutions.”

The Cyprus Energy Regulatory Authority (CERA) has approved a major energy storage project totaling 120 megawatts (MW), aimed at improving grid stability and securing ...

Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects.

Cyprus has taken a step toward modernising its energy infrastructure with the commissioning of a 3.3 MWh battery energy storage system (BESS) as part of the Apollon PV Park.

In an ambitious move towards a sustainable energy future, Cyprus is set to operationalize its first large-scale electricity storage system within the next 16 months.

In May 2025, Cyprus brought its first significant battery energy storage system (BESS) online. The project marks a major step toward enhancing the country's energy infrastructure, aligning with its goals for ...

The Cyprus Energy Regulatory Authority (CERA) has approved the Cyprus Transmission System Operator's (TSOC) request to develop and operate large-scale energy ...

Pressured by curtailments of renewable electricity and frequent outages amid a lack of flexibility, Cyprus is in a rush to install battery energy storage systems (BESS).

In May 2025, Cyprus brought its first significant battery energy storage system (BESS) online. The project marks a major step toward enhancing the country's energy ...

In an ambitious move towards a sustainable energy future, Cyprus is set to

operationalize its first large-scale electricity storage system within the next 16 months.

Discover how a commercial battery energy storage system in Cyprus can reduce peak demand charges and boost your business's energy efficiency.

Cyprus has taken a step toward modernising its energy infrastructure with the commissioning of a 3.3 MWh battery energy storage system (BESS) as part of the Apollon PV ...

Cyprus will begin implementing renewable energy storage systems in 2026 at the earliest, Energy Minister George Papanastasiou announced during parliamentary discussions ...

Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects.

Cyprus will begin implementing renewable energy storage systems in 2026 at the earliest, Energy Minister George Papanastasiou announced during parliamentary discussions ...

Cyprus' Department of Environment has approved a project for what is set to become one of the country's first battery energy storage systems with HESS Hybrid Energy ...
