You may not need an inverter for a 12V battery, but it is helpful for high-wattage appliances. An inverter changes 12V to 120V. Use a deep-cycle battery and ensure the battery capacity is at least 20% of the inverter’s wattage. For low-power devices, consider using 12V sockets. This setup ensures.

Yes, you can absolutely power your house with an inverter, but it’s crucial to understand that the inverter is just one part of a complete system.
