EMS installation in Finland base station room

Overview

Traditionally, stations have had communal dormitories where everyone sleeps. Given different sleep schedules and habits – and snoring – those days are gone, and individual rooms are a must, says Rodriguez.

What are emergency medical services in Finland?

Emergency medical services in Finland (staggered primary care system) are service networks designed to assist patients with acute health problems. Patients are first sent to an Emergency Centre, where a thorough assessment is conducted to determine the severity of the patients' illness or disability.

What are helicopter emergency medical services in Finland?
