Eastern European energy storage exports

Overview

What is energy storage Europe?

EASE will now be known as the Energy Storage Europe association, with a new identity designed to give the sector a stronger visibility. This transformation marks a significant milestone as the association approaches its 15 th anniversary and reflects the central role that energy storage now plays in Europe's energy future.

What is energy storage Europe Association?

Energy Storage Europe Association is actively shaping the legal and R&D funding framework for energy storage at EU level. Members gain direct influence in the European decision-making process. Members benefit from the Energy Storage Europe Association's expertise and technical know-how, and they can participate in EU-funded research projects.

What is the European energy storage inventory?

A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources. Energy storage helps to balance supply and demand. The European Energy Storage Inventory is the first of its kind at European level to show all forms of clean energy storage solutions.

Does Eastern Europe still import gas from Russia?

Almost all of Central and Eastern Europe is no longer dependent on natural gas imports from Moscow. In 2021, Eastern European countries imported almost half of their gas from Russia. (For the purposes of this article, the term "Eastern Europe" covers the former socialist countries of Central and Eastern Europe.).

What is the energy storage Europe rebranding?

The European Association for Storage of Energy (EASE) today announced a

rebranding to better reflect the rapid evolution of the energy storage role in the energy storage system. EASE will now be known as the Energy Storage Europe association, with a new identity designed to give the sector a stronger visibility.

Will Eastern Europe's gas market return?

Yet, a fundamental economic shift has now occurred. Eastern Europe's gas market will never return to where it was four years ago. Since the 1970s, natural gas has been Eastern Europe's most politically sensitive commodity—and has often been the turning point of the region's geopolitics.

The Energy Storage Global Conference 2025 organised by the Energy Storage Europe Association from 14-16 October, brought together industry stakeholders to discuss the latest developments in ...

Energy storage installations are rising in Central and Eastern Europe, with the source-grid-side battery market rapidly growing. PV Europe predicts a fivefold market ...

The future outlook for European energy storage markets remains highly positive, supported by ambitious renewable energy targets, grid modernization requirements, and improving ...

The Energy Storage Global Conference 2025 organised by the Energy Storage Europe Association from 14-16 October, brought together industry stakeholders to discuss the ...

Note: Europe - East includes Czech Republic, Hungary, Poland, Slovakia, Slovenia, Ukraine. Europe - South includes Bulgaria, Croatia, Cyprus, Greece, Malta, Romania.

After Russia's 2022 invasion of Ukraine, Eastern Europe successfully ended its dependence on Russian natural gas. To ensure the region's energy security, the EU must ...

The report explores trends and forecasts across residential, commercial & industrial (C&I), and utility-scale battery segments, offering deep insights into Europe's energy storage ...

A new interactive platform--the European Energy Storage Inventory --has been launched to provide near real-time insights into energy storage deployment across the EU, ...

It offers near real-time data on the deployment of storage facilities across Europe, including an interactive dashboard and map, and identifies all the technologies, from battery ...

The Europe energy storage market is witnessing remarkable growth, driven by a combination of policy frameworks, technological advancements, and increasing renewable ...

This dataset aggregates daily data on European natural gas import flows and storage levels.
