## Overview

---

Romania is rapidly emerging as one of the most dynamic markets in the Balkans for storage and renewable energy deployment. With favorable market conditions and ambitious policy support, the country is positioning itself as a key hub for battery energy storage systems (BESS).

Romania is rapidly emerging as one of the most dynamic markets in the Balkans for storage and renewable energy deployment. With favorable market conditions and ambitious policy support, the country is positioning itself as a key hub for battery energy storage systems (BESS).

Electricity market prices currently offer exceptional opportunities for BESS projects. Since July 2024, daily aFRR activation spreads have averaged €1,456/MWh, creating a strong foundation for revenue generation. These market dynamics make Romania particularly attractive for investors and.

In an accelerated wave of investments, companies in Romania are combining battery energy storage systems (BESS) with solar, hydro or wind energy, or building independent storage facilities. The list includes big names such as Verbund, Engie R.Power, Hidroelectrica. The specialized publication.

Enterprising companies in Romania's energy storage market have expansion, with recent announcements from two major players, Nova Power & Gas and Visual Fan, set to add over 580 MWh of battery capacity to the grid. The investment wave, supported by key regulatory changes, is elevating Romania in the.

In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or building standalone energy storage facilities. The group includes R.Power, Hidroelectrica, Engie and more big names. Recent updates about investments in battery energy storage.

Whether you're located in Bucharest, Cluj-Napoca, Constanța, or a remote village in Transylvania, GSL ENERGY offers state-of-the-art factory-direct lithium battery storage systems customized for Romanian conditions. Why is

solar battery storage on the rise in Romania?

Many villages and small towns.

With an average price of €103.5/MWh in 2024, Romania was second only to Ireland and Italy among the most expensive spot electricity markets in the EU. High prices are explained by several internal and external factors. Market structure: The day-ahead market (DAM) operated by OPCOM, which trades. How much gas is in storage in Romania?

In Romania, the amount of gas in storage has fallen to 63% in just one and a half months, with more than a third of the gas in storage being consumed, a steeper fall than the European average, according to Gas Infrastructure Europe. On January 8, 2025, the filling rate of storage facilities in Romania was 61.74%.

Will Romania's natural gas storage facilities reach 80% capacity?

BUCHAREST, Oct 3 (Reuters) - Romanian natural gas storage facilities have been filled above a targeted 80% capacity and could reach 90% by Nov. 1, deputy Energy Minister Dan Dragan said on Monday. Unlike other countries in the region, Romania relies less on Russian gas.

Does Romania have a double taxation of stored electricity?

Romania's National Energy Regulatory Authority (ANRE) recently eliminated the double taxation of stored electricity. The new rules exempt electricity stored and then reinjected into the grid from several tariffs, removing a significant financial barrier for investors.

How much does electricity cost in Romania?

In April 2025, the average wholesale electricity price in Romania amounted to 87.21 euros per megawatt-hour. Wholesale electricity prices in the country peaked in August 2022, surpassing 490 euros per megawatt-hour. Add this content to your personal favorites. These can be accessed from the favorites menu in the main navigation.

What is energy in Romania?

Energy in Romania describes energy production, consumption and import in Romania. Romania has significant oil and gas reserves, substantial coal deposits and it has considerable installed hydroelectric power. However,

Romania imports oil and gas from Russia and other countries.

How much storage capacity will Romania have in 2025?

This single project will double Romania's current installed storage capacity of 398.8 MWh, a figure that comes from transmission system operator Transelectrica, and mentioned by Romania's energy minister Sebastian Burduja in April, 2025.
