# Equatorial Guinea Energy Export and Storage Company

## Overview

---

Can oil and gas companies operate in Equatorial Guinea?

The Hydrocarbons Law and the National Content Regulation establish various requirements for international oil and gas companies that wish to operate in Equatorial Guinea. These include a minority partner stake for either the state oil company (GE Petrol) or the state gas company (Sonagas).

Is Equatorial Guinea a gas exporter?

In 2022, Equatorial Guinea ranked 15th among LNG exporters globally. Its gas exports are more diversified than its oil exports, almost equally targeting the markets in Europe (37 percent), Asia-Pacific (34 percent) and Latin America (29 percent). Area: 28,051 square kilometers; slightly smaller than Belgium.

How has the oil industry benefited Equatorial Guinea?

The rapid rise of the petroleum industry in Equatorial Guinea has provided money for the government from two fronts: oil profits and foreign aid. It is important to note that both of these are without any strings attached.

Is Equatorial Guinea rich in oil or gas?

Equatorial Guinea is not particularly rich in oil or gas. Its proven oil reserves (1.1 billion barrels) account for about 0.07 percent of the world's total and 0.9 percent of Africa's, ranking 37th in the world and ninth in the continent.

Does Equatorial Guinea have a sustainable agricultural sector?

However, with strategic investments in sustainable farming practices, Equatorial Guinea has the potential to strengthen its agricultural sector while reducing dependence on oil and gas.

What is the electricity rate in Equatorial Guinea?

Electrification rates are relatively high in Equatorial Guinea at 66%. The

country began oil production in the late 1990s and began LNG exports in 2007.
