

## **PDEOZE PowerContainer**

# **Finnish solar panel BESS manufacturer**

## Overview

---

The advanced BESS was designed and built as a turnkey project by the Finnish technology company Merus Power. Located in Valkeakoski, the facility has an installed capacity of 30 MW and 36 MWh. How does Bess work in Finland?

BESS operators can also participate in cross-border markets to provide storage capacity for ancillary services, such as frequency regulation, which helps maintain grid stability and reliability. Ancillary services are currently the primary revenue source for BESS in Finland.

Why should you choose solar Finland?

Solar Finland and its subsidiaries with strong long-term background are experts in all aspects of solar energy. Our extensive know-how and experience of over 40 years make it possible to develop in different areas making our products and services competitive in the solar energy markets both domestically and abroad.

Is paistinkulma energy storage the largest battery energy storage system in Finland?

Paistinkulma Energy Storage is set to become one of the largest battery energy storage systems (BESS) operating in Finland's frequency reserve market. Taaleri Energia, a Finnish-based wind and solar energy developer and fund manager, has launched its first BESS investment in Lempäälä, Finland.

Why does Finland need Bess?

The need for BESS is exceptionally high in Finland because the country has set one of the world's most aggressive climate targets. The government has a legal obligation to reach carbon neutrality by 2035. Renewable energy sources account for over 50% of electricity production, and several renewable projects are being planned or developed.

Who makes Salo solar panels?

Salo Solar designs, sells and builds comprehensive turnkey solar electricity systems. Salo Tech manufactures and sells high-quality Finnish SALO® solar panels. Salo Automation designs and builds production lines and machines meant for the production of solar panels. Salo Energy builds solar parks and invests in local solar electricity.

Is Bess a good alternative to electricity?

BESS are excellent alternatives because of their capability to charge and discharge energy. The Finnish electricity market is part of the Nordic, the most integrated and liberalized electricity market globally (International Energy Agency, 2023b).
