# **Greece s new energy storage subsidy project**

## Overview

---

Does Greece have a battery storage subsidy program?

Greece's latest auction has awarded subsidies to 188.9 MW of standalone, front-of-the-meter, utility-scale battery energy storage. The auction was the third and final edition of a battery storage subsidy program launched in 2023, with the country now turning its focus towards a new 4.7 GW unsubsidized BESS scheme.

What is Greece's third energy storage auction?

Greece's third energy storage auction has been completed with nine projects selected. It was the final auction where the state provides subsidies to build battery energy storage systems (BESS). A total of almost 800 MW in capability has been awarded through all three storage auctions.

How much does a mw subsidy cost in Greece?

However, in December 2024, Greece downsized the third auction to 200 MW. The first two auctions concerned projects installed anywhere in Greece, while the third auction involved projects developed in former coal mining regions. The average subsidy price in the third auction exercise came at €52589.16/MW/year.

Does Greece have a zero-subsidy battery system?

The much-awaited ministerial decree for zero-subsidy standalone battery systems has been published in Greece. So far, Greece has provided support to 900 MW of standalone storage projects under three previous auctions.

Does Greece still subsidize Bess?

Moving forward, Greece is abandoning subsidizing BESS via auctions. Instead, the country has recently launched a new program for 4.7 GW of unsubsidized BESS which will be offered priority grid connections on a merchant basis without subsidy support.

How many MW of storage will Greece need by 2030?

The majority of the projects (2,650 MW) belong to Group Γ and will connect to ADMIE as follows per region. A key factor driving companies is that this large capacity will cover all the storage needs Greece will require by 2030.
