

## **PDEOZE PowerContainer**

# **Home energy storage battery sales in the Netherlands**

## Overview

---

Is the Netherlands a good market for battery storage?

The Netherlands is an emerging market for battery storage but, due to the lack of saturation, also a highly exploitable one. In early 2025, Enspired, together with Flexcity and S4 Energy, reached an exciting milestone by taking the country's first 4-hour BESS live in a cross-market optimization setup.

Do Dutch home battery purchases keep driving battery storage installations?

Dutch home battery purchases keep driving battery storage installations. According to Dutch New Energy Research's Nationaal Smart Storage Trendrapport 24/25, 410 MWh of new battery capacity was installed in the Netherlands in 2023 - 1 MWh is enough to power a couple hundred homes for a day.

How many home batteries are there in the Netherlands?

56% of the total number of batteries purchased in the Netherlands last year (13,600 of 24,400) were small home batteries—less than 5 kWh—followed by bigger home batteries, with up to 20 kWh capacity. With battery sales ramping up worldwide, the Netherlands, too, will add more storage.

What happened to battery storage in the Netherlands in 2023?

GREEN+ - 2023 saw a 260% increase in installed battery storage capacity in the Netherlands. We dig into the numbers in this new episode of Behind the Figures. Dutch home battery purchases keep driving battery storage installations.

Are batteries a sustainable solution to future-proof the Netherlands' electricity system?

Batteries, both BTM and grid-scale FTM (front-of-the-meter), play an important role in mitigating such challenges and offer a sustainable solution to future-proof the Netherlands' electricity system. But how can it integrate more

batteries if the grid struggles to handle the current load?

.

Are battery energy storage installations limiting the deployment of battery energy systems?

While lengthy authorization processes are limiting the deployment of battery energy storage installations (BESS), the lion's share of purchased battery systems is in the residential sector. In fact, the paper shows that 98% of the Dutch installations are small ones (less than 20 kWh).

## Home energy storage battery sales in the Netherlands
