Honduras Wind Solar and Energy Storage Project

Application scenarios of energy storage battery products

Overview

The project, a national key initiative of Honduras, will significantly enhance the stability of Honduras' power grid and its capacity to integrate renewable energy upon completion, contributing to the optimization of local energy structures and the sustainable development of.

The project, a national key initiative of Honduras, will significantly enhance the stability of Honduras' power grid and its capacity to integrate renewable energy upon completion, contributing to the optimization of local energy structures and the sustainable development of.

Last week (7 November) saw bids opened for a 75MW/300MWh BESS tender launched by the government of Honduras, in Central America. The public event marked the opening of bids for the energy storage procurement, called LPI-001-ENEE-UEPER-2024, for the 'Supply, installation, testing and commissioning.

The National Electric Power Company (ENEE) has selected a Chinese-Honduran consortium to design, supply, install, test, and commission a grid-connected battery energy storage system (BESS) at the Amaratéca substation in the department of Francisco Morazán. Honduran state-owned utility ENEE has.

Honduras has unveiled a significant energy tender to secure an additional 1,500 MW of capacity, with a strong emphasis on renewable energy. The Ministry of Energy's plan to procure 975 MW from these clean sources is a cornerstone of the nation's strategy to diversify its energy mix and enhance grid.

Recently, Windey, in collaboration with EQUINSA, a local Honduran power company, successfully won the EPC turnkey contract for Honduras' first energy storage project—the Honduras Energy Storage Project—marking a critical breakthrough of "first bid, first win" in its international energy storage.

Honduras has awarded a US\$50.2 million contract for a 75 MW battery energy storage system to the Chinese-Honduran consortium Windey-Equinsa. This

project, selected through an international tender with six proposals, will be the largest energy storage system in Central America once operational by.

Last week (7 November) saw bids opened for a 75MW/300MWh BESS tender launched by the government of Honduras, in Central America. If you want to read more, join the ENERGY-HUB club Try the monthly membership in the ENERGY-HUB club for free! 25. 06. 2025 17:00 <https://>, Pilar Sánchez.

Honduras Wind Solar and Energy Storage Project

A contract worth \$50.2 million has been awarded to the Chinese-Honduran consortium Windeny-Equinsa for the construction of a 75 MWh energy storage system.

This tender marks a significant milestone in Honduras' energy transition, positioning the country as a potential leader in renewable energy within Central America.

Windey, in partnership with Honduran energy company EQUINSA, has signed a major EPC contract for a 75MW/300MWh energy storage project in Honduras.

The Honduras Ministry of Energy has published bidding terms for a 1.5 GW auction, including 975 MW of renewable energy with storage. The move follows a procurement ...

This tender marks a significant milestone in Honduras' energy transition, positioning the country as a potential leader in renewable energy within Central America.

The project, a national key initiative of Honduras, will significantly enhance the stability of Honduras' power grid and its capacity to integrate renewable energy upon ...

Six separate companies have submitted bids to build the 4-hour BESS project, and it will be implemented next year after evaluation and award phases are completed, Carbajal said. The Amarateca substation ...

Windey, in partnership with Honduran energy company EQUINSA, has signed a major EPC contract for a 75MW/300MWh energy storage project in Honduras.

On June 26, 2025, Honduras' energy utility, ENEE, launched a 1,500 MW international public tender, aimed at bolstering Honduras' national energy supply. The tender is open to both ...

This project, selected through an international tender with six proposals, will be the largest energy storage system in Central America once operational by the end of 2025.

Honduran state-owned utility ENEE has awarded the contract to supply a grid-connected 75 MW/300 MWh BESS to Chinese state-backed wind company Windey and local ...

A contract worth \$50.2 million has been awarded to the Chinese-Honduran consortium Windeny-Equina for the construction of a 75 MWh energy storage system.

Six separate companies have submitted bids to build the 4-hour BESS project, and it will be implemented next year after evaluation and award phases are completed, Carbajal ...
