How big an outdoor power supply should I use in Spain

Overview

The country uses a power supply of 230V. Dual voltage appliances working between 110-240V will work without a converter or transformer. Check if your appliance's plug type fits the Spanish outlets before use. Voltage is another important factor.

The country uses a power supply of 230V. Dual voltage appliances working between 110-240V will work without a converter or transformer. Check if your appliance's plug type fits the Spanish outlets before use. Voltage is another important factor.

Spain uses Type C and Type F outlets, both of which have two round holes. The difference between them is that Type F also has two grounding clips. You'll find both outlet types throughout Spain, from Barcelona to the countryside. Both can take any plug type with two round prongs, as long as there's.

Here is a quick guide to help you figure out if you need a travel adapter for Spain: [What Power Plugs and Outlets Are Used in Spain?](#)

In Spain, there are two main types of power plugs and outlets: Type C and Type F. Type C: Type C plugs have two round prongs on either side of the plug, commonly.
