Tips For Properly Storing Lithium Ion Batteries
Best Storage Voltage For LFP
Best Storage Voltage For NMC
Best Storage Voltage For LTO
Best Storage Voltage For Lead Acid
Best Storage Voltage For Nimh
LTO cells have a higher max charge voltage of 2.9 volts per cell, but they also have a lower nominal voltage of 2.3 volts per cell. So, going on the same logic as above, simply add 5 or 10 percent to the nominal voltage. $2.3 \text{ volts} \times 1.05$

= 2.4 volts This means that the best storage voltage for LTO cells is between 2.4 volts and 2.5 volts per cell. See more on [cellsaviors energystoragecabinet](#)
