.

One of the most significant factors that determine the cost of an outdoor energy power supply is its capacity. Capacity is measured in watt - hours (Wh) or amp - hours (Ah), and it indicates how much energy the power supply can store. Generally, the higher the capacity, the more expensive the power.

The Jackery Explorer 290 provides 290-Watt hours of power with 200W continuous and 400W peak output to handle your portable power needs, engineered with a rechargeable lithium-ion battery, which provides maintenance-free energy without the hassle of fuel or fumes. It is perfect for indoor and.
