Huawei Australia Portable Power Bank

Overview

What is a good power bank?

Both are great but suited to different uses. A 10,000 mAh (37 Wh) power bank is generally best for charging phones and other small devices. It's compact enough to fit in a bag or pocket, making it ideal for day-to-day use. A 20,000 mAh (74 Wh) power bank, on the other hand, is larger and heavier, so it won't fit easily into a pocket.

Which power bank is best for a MacBook Pro?

Best laptop fast charging A premium power bank from a premium brand, that can output up to 140W (28V, 5A) to give the fastest charging speeds for your high-end MacBook Pro or other laptop. With multiple USB ports and a large 24,000 mAh (86.4 Wh) capacity, it's also great for travel.

Is the Samsung t2055 a good mini power bank?

You need a large capacity: This isn't a mini power bank only good for a phone charge or two, and the T2055 has a hefty 20,000 mAh capacity that can keep a phone going for days. ☐ You want to super-fast charge or charge a laptop: The T2055 doesn't do 20V charging, and is limited to 20W, so can't handle options like Samsung Super Fast charging.

Is Ugreen a good power bank?

The Ugreen power bank is more compact than comparable models from competing brands, but still offers a large 25,000 mAh (90 Wh) capacity and up to a high-end 140W (28V, 5A) output. While premium, the power bank is usually sold at an affordable price, and is a great option for phone or laptop charging. Read more below Best slim but powerful.

Can you use a power bank on a plane?

The latest is Emirates, with a ban of in-flight power bank use from October 1, 2025. You will also be limited to one power bank under 100 Wh, and it must

be placed in your seat pocket or a bag under the seat in front of you, not in the overhead stowage bins.
