

## **PDEOZE PowerContainer**

# **Huawei Cyprus Hybrid Energy Storage Project**

## Overview

---

Cyprus' Department of Environment has approved a project for what is set to become one of the country's first battery energy storage systems with HESS Hybrid Energy Storage Systems is planning to install a 59 MW facility with a capacity of 120 MWh. What is a hybrid power system?

Huawei's Hybrid Power solutions combine Genset, photovoltaic, energy storage, and grid data to optimize system performance, enhance sustainability, and maximize energy efficiency for telecom and industrial applications.

How many energy storage applications have been approved in Cyprus?

The Cyprus Energy Regulatory Authority (CERA) representatives reported establishing a regulatory framework for energy storage in 2019, followed by market rules approval in 2021. The Cyprus Transmission System Operator has received 13 storage applications totaling 224 megawatts capacity, with eight applications processed and five under review.

Why should you choose Huawei for power plants?

In terms of operation and maintenance (O&M), Huawei provides full-link diagnosis capabilities to improve the safety and performance ratio (PR) of power plants. Furthermore, Huawei provides intelligent AC and DC safety protection for PV, ensuring personal and asset safety across various scenarios.

Why does Cyprus waste so much energy?

AKEL MP Costas Costa characterised Cyprus as "the only country in the world where thousands of megawatt-hours go unused due to lack of centralised green energy storage systems," adding: "During the day we waste megawatt-hours because we lack storage, and at night we are one step away from blackouts."

Why did Huawei help Yalong hydro build the 1 GW Kela PV project?

In Ganzi, Sichuan, Huawei Digital Power helped Yalong Hydro build the 1 GW Kela PV Project, which is the world's largest and highest-altitude hydro-solar hybrid power plant. The project leverages digital and intelligent technologies to improve quality and efficiency, setting a benchmark for intelligent power plants.

What is Huawei ESS & how does it work?

Huawei provides a one-fits-all solution that integrates optimizers, PV, ESS, chargers, loads, grid, and management system to help various industries go green and low-carbon by providing system-level active safety and stronger capabilities for green power supply and power grid support. Safety is especially critical in C&I ESS scenarios.

Oct 7, 2025 · Cyprus' Department of Environment has approved a project for what is set to become one of the country's first battery energy storage systems with HESS Hybrid Energy ...

Apr 30, 2025 · Huawei Digital Power successfully concluded the FusionSolar C& I Future Summit 2025, unveiling the groundbreaking C& I Smart Hybrid Cooling ESS. The event brought together industry leaders and ...

May 6, 2025 · Huawei's Smart String Grid Forming ESS gleans more value from energy storage through power electronics technology, as well as ensuring grid safety and stability through digital intelligence. It opens a ...

Huawei's Hybrid Power solutions combine Genset, photovoltaic, energy storage, and grid data to optimize system performance, enhance sustainability, and maximize energy efficiency for ...

Oct 7, 2025 · Cyprus' Department of Environment has approved a project for what is set to become one of the country's first battery energy storage systems with HESS Hybrid Energy Storage Systems is planning to install ...

Oct 6, 2025 · The Department of Environment of Cyprus issued an approval for what could become one of the country's first battery energy storage systems.

Jun 11, 2024 · [Shanghai, China, June 12, 2024] During SNEC 2024, Huawei held the FusionSolar Strategy and Product Launch on June 12, attracting more than 600 participants that included global leaders, enterprise ...

Oct 13, 2025 · The focus is clearly on safety and efficiency - including for the new, hybrid-

cooled Luna2000-215kWh battery storage system for C& I. It has been awarded the highest safety certificate by TÜV Rheinland.

Hybrid Inverter Solutions for Off-Grid Containerized Systems Our hybrid inverters bridge solar input, energy storage, and local grid or generator power in containerized environments. With ...

Mar 4, 2025 · The Cyprus Energy Regulatory Authority (CERA) representatives reported establishing a regulatory framework for energy storage in 2019, followed by market rules ...

Huawei's Hybrid Power solutions combine Genset, photovoltaic, energy storage, and grid data to optimize system performance, enhance sustainability, and maximize energy efficiency for telecom and industrial ...

Thank you, Andreas Procopiou, PhD for your insightful presentation on "Energy Storage: Unlocking Cyprus RES Potential". It was truly our honor to host you at the Huawei Fusionsolar ...

Jun 11, 2024 · [Shanghai, China, June 12, 2024] During SNEC 2024, Huawei held the FusionSolar Strategy and Product Launch on June 12, attracting more than 600 participants that included ...
