

## **PDEOZE PowerContainer**

# **Huawei Poland Independent Energy Storage Project**

## Overview

---

GoldenPeaks Capital and Huawei in Poland have signed a memorandum of understanding for 500 MWh of battery energy storage systems (BESS) in Central and Eastern Europe. Why is energy storage important in Poland?

With the rising share of intermittent renewable power, large-scale battery storage systems are becoming critical to maintaining grid stability. By addressing challenges such as peak load balancing and frequency regulation, energy storage enhances the resilience and flexibility of Poland's electricity system.

What is Poland's energy storage subsidy?

Learn about Poland's €1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.

How much money does Poland spend on battery energy storage?

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion (approximately €1 billion).

Is Poland ready to scale up its energy transition?

By enabling the deployment of grid-scale battery systems, the country is strengthening its ability to integrate larger volumes of clean energy, reduce dependence on fossil fuels, and enhance power system stability. The scheme sends a strong signal to investors and technology providers that Poland is ready to scale up its energy transition.

Why is Poland launching a grid-scale battery system?

The introduction of this storage support program marks a key milestone in Poland's energy transformation. By enabling the deployment of grid-scale battery systems, the country is strengthening its ability to integrate larger

volumes of clean energy, reduce dependence on fossil fuels, and enhance power system stability.
