## Overview

---

Naval Air Station Keflavik (NASKEF) was a United States Navy air station at Keflavík International Airport, Iceland, located on the Reykjanes peninsula on the south-west portion of the island. NASKEF was closed on 8 September 2006 and its facilities were taken over by the Icelandic Defence Agency as their primary base (from 2011 the agency was handed over to the Icelandic Coast Guard). History After being granted self-governance by in 1918 with the signing of the 25-year , Iceland followed a policy of strict neutrality in international affairs. In 1939, with war imminent i.

Naval Air Station Keflavik was the host command for all U.S. defense activities in Iceland. The major commands stationed on the base were the USAF's 85th Group, Fleet Air Keflavik, the headquarters of the U.S.-provid.

The 1965 decision to deploy the Sound Surveillance System to the was followed by establishment of Naval Facility Kefl.

Does Iceland radio offer satellite communication?

Iceland Radio offers satellite communication service to aircrafts through IRIDIUM and IMMARSAT. When HF conditions deteriorate, a satellite communication can be applied. If the aircraft is equipped with a satellite phone on board, pilots can call Iceland Radio centre when necessary.

What frequencies does Iceland radio use?

From Iceland Radio, aeronautical communication service is provided every day for 24 hours through HF and VHF GP frequencies. VHF service is continuous over the North Atlantic Ocean with COM equipment located in Iceland, Greenland, and the Faroe Islands. Operating frequencies are VHF 126.550, VHF 127.850, and VHF 129.625.

Can Iceland radio call aircraft?

Moreover, Iceland Radio can call aircrafts equipped with a satellite phone. Aircrafts can request a phone patch to their company dispatch unit or to Medlink when necessary. Through HF and landline interconnection, Iceland radio can call and connect an aircraft to their company dispatch unit or to

Medlink.
