Installing solar panels on the upper floor of a self-built house in Sierra Leone

Overview

How do you install solar panels on a house?

Racks and roof mounts to place your solar panels on and an inverter to convert solar energy into alternating current may also be necessary. "If you work with a turn-key installer that communicates at each step of the process, the home solar installation should be easy and worry-free," says Matt Johnson, co-owner of Namaste Solar.

Should you install solar panels yourself?

Installing solar panels yourself can save you thousands of dollars while giving you more control over your renewable energy system. You can easily set up a DIY solar system if you're comfortable with basic construction, running power tools, and electrical wiring.

Can I install my own Solar System?

Once approved, you can activate your system and start generating your own solar power. Installing your own solar system can be a rewarding and cost-effective way to harness renewable energy. By following these steps and thoroughly planning your project, you can join the growing number of homeowners enjoying the benefits of DIY solar installation.

Should I choose a roof or a ground-mounted solar system?

If your roof works for solar and can fit enough solar panels to meet your energy needs, it's usually best to choose rooftop solar panels. If you need a really large system that won't fit on your roof and you have enough open land, opt for ground-mounted panels. Each property is unique.

Is DIY solar panel installation possible?

DIY solar panel installation is possible if you feel comfortable dealing with the issues outlined in this guide, but we only recommend it for small projects. Solar panel installation is complicated and can be dangerous, so you may

prefer working with an installer.

Can solar panels be installed on a roof?

If the roof is not suitable, homes can be equipped with ground-mounted solar arrays. Ground-mounted panels can be installed anywhere with good sun exposure and enough open space. A minimum of 350 square feet is usually required. Installing solar panels requires the following steps:
