**Is there a place in Costa Rica
where I can replace the lithium
battery cabinet**

Overview

A pioneering company recycles this waste in Costa Rica in search of a circular economy future. Phones, laptops, tablets, electric vehicles and solar receivers need lithium batteries to operate. The question is what to do with them when they run out and become garbage that takes 500 years to.

A pioneering company recycles this waste in Costa Rica in search of a circular economy future. Phones, laptops, tablets, electric vehicles and solar receivers need lithium batteries to operate. The question is what to do with them when they run out and become garbage that takes 500 years to.

“Today we know that garbage does not exist, we know that they are resources that we can renew”, says to AFP Guillermo Pereira, general director of Fortech, a company based in Cartago, 27 km east of San José, dedicated for 27 years to the recycling of technological products and for the last six.

Costa Rica, a country where open pit mining is banned, has become a leader in the extraction of heavy metals such as lithium—not from the Earth, but old batteries. The Fortech recycling factory which opened nearly three decades ago in Cartago about 27 kilometers (17 miles) from the capital San.

The Fortech recycling factory which opened nearly three decades ago in Cartago about 27 kilometers (17 miles) from the capital San Jose, is referred to by its staff as an "urban mine." lithium contained in rechargeable batteries used in everything from mobile phones and laptops to electric cars and.

With the support of partners in Europe and Asia, including the German Development Cooperation Agency, GIZ, FORTECH initiated a research process to develop technology capable of crushing the battery in an inert atmosphere, as well as separating the resulting mixture of materials (aluminum, copper.

The answer lies in energy independence and climate resilience. While lithium-ion dominates globally, our volcanic soil has sparked unique adaptations: Fun fact: A Monteverde family's DIY battery system survived 2024's "Great Sloth

Blackout" by powering their fridge for 72 hours – crucial for. Is Costa Rica a leader in the extraction of lithium?

Costa Rica, a country where open pit mining is banned, has become a leader in the extraction of heavy metals such as lithium -- not from the Earth, but old batteries.

How many batteries are disused in Costa Rica?

Some 1,500 tons of batteries fall into disuse annually in Costa Rica, says Francisco, the company's project manager. While mining multinationals seek to extract lithium from the salt flats of Chile, Bolivia or Australia, in Costa Rica this company innovates with "urban mining" that recycles minerals.

Can a battery be used for urban mining in Costa Rica?

Daniel Rivas, technical manager in charge of batteries at Fortech, said that they are looking to "recover the materials to be able to carry out urban mining" and not have to "go to a mine to do more damage to the environment". Mining is prohibited by law in Costa Rica.

Is mining illegal in Costa Rica?

Mining is prohibited by law in Costa Rica. This Fortech plant "makes Costa Rica a pioneer in Latin America in the valorization of used lithium batteries," notes the German Development Cooperation Agency GIZ. The University of Aachen in Germany estimates that by 2028 the amount of discarded batteries will exceed the recycling capacity in Europe.
