Is there any 5G base station communication in Peru

Overview

What is 5G NSA?

5G services are provided to customers at similar prices to 4G because 5G NSA is only available in certain areas. Telecom operators are allowed to use existing frequencies on the AWS, 2.5 GHz and 3.5 GHz bands. 3. Has 5G been launched for industrial purposes?

For which sectors?

No. 5G for industrial purposes has not been launched. 4.

How will 4G affect the Pan American Games?

They will need to extend 4G service along key routes, including the Panamericana Norte, Sur, and major national roads, and provide necessary infrastructure for the Pan American Games. The new regulation is designed to enhance telecommunications services, enabling 5G networks to accommodate more users, connections, and higher speeds.

What is 5G & why is it important?

“5G will facilitate widespread device connectivity without sacrificing transmission quality, supporting applications like the Internet of Things, telemedicine, tele-education, automation, and remote management,” emphasized Minister Pérez Reyes.

Are 5G spectrum licences reactivated?

5G spectrum licences have not been awarded yet. However, in January 2023 the bidding process for 4G bands was reactivated through the “ Proposal for assignment of frequency bands 3.5 GHz, and 26 GHz and Identification of the 6 GHz frequency band for the development of 5G services and digital technologies ”.
