Jamaica Yang Solar Power Generation Home

Overview

Will JPS build a solar power plant in Jamaica?

Power utility Jamaica Public Service Company, JPS, is investing US\$300 million to construct Jamaica's largest solar power plant and a battery storage facility, starting this month. The renewable energy facility will replace JPS's aged Hunts Bay.

Will Jamaica generate 50% of its electricity by 2030?

Jamaica has set an ambitious aim of generating 50% of its electricity from renewable sources by 2030, reflecting its commitment to sustainable energy and climate resilience.

Why is Jamaica struggling with energy security and economic resilience?

Jamaica's energy sector has long been dominated by a reliance on imported fossil fuels, which has posed significant challenges to its energy security and economic resilience. The country has faced volatility in global oil prices, leading to substantial foreign exchange expenditures and economic instability .

Who owns Jamaica's energy grid?

Jamaica's energy grid comprises 789MW of capacity, 80 per cent of which is owned by the JPS. The utility purchases 168MW from independent power producers that are contracted to supply electricity to the national grid, JPS said last month in tender documents to suppliers.

Do fossil fuels dominate Jamaica's energy landscape?

Despite the progress in renewable energy adoption, fossil fuels dominate Jamaica's energy landscape. As of 2020, fossil fuels amounted to approximately 87% of Jamaica's electricity generation . This heavy reliance on fossil fuels, particularly oil, presents significant challenges to the nation's energy security and environmental objectives .

Will JPS replace Hunts Bay power plant?

The renewable energy facility will replace JPS's aged Hunts Bay power plant in Kingston, which runs on fuel. The project encompasses 133 megawatts of solar energy and 171.5MW of battery storage.
