Latvian energy storage equipment sales

Overview

Why are energy storage systems important in Latvia?

Energy storage systems are an essential element of Latvia's path towards a sustainable and energy-independent future. The importance of these technologies is being recognized and invested in by a growing number of companies and public institutions.

When will battery energy storage systems be installed in Latvia?

The most recent update regarding BESS installations is that in Tume and Rēzekne, Latvia's transmission system operator "Augstsprieguma tīkli" (AST) in June 2025 installed battery energy storage systems with a combined capacity of 80 MW and 160 MWh, which will undergo testing until October 2025.

What is Latvia's first storage battery system?

In November 2024, Utilitas Wind Ltd inaugurated Latvia's first storage battery system with a capacity of 10 MW and 20 MWh in Targale, next to the existing wind park.

In November 2024, Utilitas Wind Ltd inaugurated Latvia's first storage battery system with a capacity of 10 MW and 20 MWh in Targale, next to the existing wind park.

Bids have been received by Latvia's grid operator AST for an 80MW/160MWh BESS project while developers Corsica Sole and Everon will build a 200MW system in ...

Rolls-Royce has received an order from the Latvian transmission system operator Augstsprieguma tikls (AST) to supply a large-scale mtu battery storage system to secure the ...

Latvia's transmission system operator, JSC "Augstsprieguma tikls" (AST), has received its first shipment from Italy. Rolls-Royce Solutions GmbH has delivered inverters and ...

In Latvia, developer Utilitas Wind announced the official opening of a 10MW/20MWh battery energy storage system (BESS) last week (1 November) in Targale, a village in Latvia's north-eastern Ventspils region.

In Latvia, developer Utilitas Wind announced the official opening of a 10MW/20MWh battery energy storage system (BESS) last week (1 November) in Targale, a village in Latvia's ...

Rolls-Royce has received an order from the Latvian transmission system operator Augstsprieguma tīkls (AST) to supply a large-scale mtu battery storage system to secure the Latvian power grid.

The most promising sectors for renewable energy equipment in Latvia are energy efficiency solutions, biomass power, wind energy, and energy produced in combined heat and ...

The addition of two utility-scale battery energy storage systems (BESS) in Latvia marks the final milestone in synchronizing the Baltic power grids with continental Europe, ...

Energy storage systems are an essential element of Latvia's path towards a sustainable and energy-independent future. The importance of these technologies is being recognized and invested in by a growing ...

Danish renewables developer European Energy A/S said on Friday it has sold a 50% stake in its 111-MW Saldus solar and battery project in Latvia to Sampension, recycling ...

The delivery includes inverters and battery control equipment for a battery energy storage system (BESS), one of the most powerful in the European Union. The system, with a ...

The delivery includes inverters and battery control equipment for a battery energy storage system (BESS), one of the most powerful in the European Union. The system, with a total capacity of 80 MW and 160 ...

Energy storage systems are an essential element of Latvia's path towards a sustainable and energy-independent future. The importance of these technologies is being ...

Danish renewables developer European Energy A/S said on Friday it has sold a 50% stake in its 111-MW Saldus solar and battery project in Latvia to Sampension, recycling ...

6Wresearch actively monitors the Latvia Energy Storage Solutions Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, revenue analysis, ...
