# Lesotho exports energy storage

## Overview

---

What is the energy sector like in Lesotho?

The energy sector in Lesotho is characterised by an enormous potential of renewable energy resources. Lesotho has the potential to produce up to 6,000 MW from wind and solar, 4,000 MW from pump storage, 400 MW from conventional hydropower, and more than 1.000 MW from hydropower.

Can Lesotho produce electricity?

Lesotho has the potential to produce up to 6,000 MW from wind and solar, 4,000 MW from pump storage, 400 MW from conventional hydropower, and more than 1,000 MW from hydropower. However, the current demand for electricity continues to exceed supply.

Will Lesotho be able to produce electricity by 2030?

Lesotho has the potential to produce up to 6,000 MW from wind and solar, 4,000 MW from pump storage, 400 MW from conventional hydropower, and more than 1,000 MW from hydropower. Lesotho submitted their first NDC in January 2017 which makes them recognised.

What is the electricity demand in Lesotho?

Electricity demand in Lesotho has maintained and continues to increase. At the end of 2013, electricity demand was 72 MW while local generation exceeded around 50% of the demand. Electricity consumption in Lesotho continues to increase.

Who owns Lesotho electricity company?

The Lesotho Electricity Company (Pty) Ltd (LEC) is wholly owned by the Government of Lesotho (GoL) and acts as the utility company. It has been registered in terms of the Companies Act of 1967 (as amended) and established in 2006 in terms of the LEC (Pty) Ltd Establishment Act.

Does Lesotho use biomass?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. Lesotho: How much of the country's electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.
