

PDEOZE PowerContainer

Lithium battery pack high power discharge equipment

Lithium battery pack high power discharge equipment

ELP400 has built-in various test and maintenance modes, which are suitable for the discharge, charging, cycle charging and discharging tests of various lithium batteries on the market.

The DSF-20 is equipped with state-of-the-art technology that allows for detailed analysis and testing of lithium battery packs. From voltage monitoring to capacity testing, this unit covers all critical aspects, ensuring ...

We manufacture advanced charge/discharge testing equipment based on our unique electrical control technology, and have sold many of these products to users in Japan and overseas.

Explore our versatile Battery Pack options featuring 72V Lithium-Ion variants with capacities of 100Ah, 200Ah, and 300Ah. Designed for optimal performance, our packs deliver ...

We manufacture advanced charge/discharge testing equipment based on our unique electrical control technology, and have sold many of these products to users in Japan and overseas.

From power conversion to battery to electrical safety, our test systems will maximize your time, improve your validation process, and increase your throughput. High precision, integrated ...

By editing test steps, the user may perform constant current charge, constant pressure charge and constant current/power/resistance discharge tests on multi-channel cells or battery packs.

ELP400 has built-in various test and maintenance modes, which are suitable for the discharge, charging, cycle charging and discharging tests of various lithium batteries on the market.

Adopting a wide voltage design, it is suitable for charging and discharging tests of battery modules of different voltage levels. Supports various lithium batteries and nickel metal hydride batteries. Supports real-time ...

Lithium Battery Discharge Machine is used to perform quick discharging in battery dismantling, storage, transportation, repair, recycling of battery manufacturers and car factory etc., which is ...

The battery charge and discharge machine is suitable for 18650 battery pack cycle life test. The battery tester uses the energy feedback technology, during the 18650 battery pack cycle life ...

By editing test steps, the user may perform constant current charge, constant pressure charge and constant current/power/resistance discharge tests on multi-channel cells or battery packs.

Product description: The battery cycle charge and discharge system is a testing equipment for high voltage battery pack cycle life test, charge/discharge test, capacity test and charge ...

The DSF-20 is equipped with state-of-the-art technology that allows for detailed analysis and testing of lithium battery packs. From voltage monitoring to capacity testing, this unit covers all ...

Product description: The battery cycle charge and discharge system is a testing equipment for high voltage battery pack cycle life test, charge/discharge test, capacity test and charge-discharge efficiency test

Adopting a wide voltage design, it is suitable for charging and discharging tests of battery modules of different voltage levels. Supports various lithium batteries and nickel metal hydride batteries. ...
