

PDEOZE PowerContainer

Malaysia double glass solar curtain wall manufacturer

Overview

What is a double glazing unit incorporating solar control products?

Double glazing unit incorporating solar control products such as Low-E, Solar Low-E and reflective glass significantly reduce solar heat gain, glare control, reduced air conditioning costs, improved noise reduction, and increased security. It is widely use in application like curtain wall, windows, industries products like freezer and cooler.

What is curtain wall glazing?

The curtain wall method of glazing allows glass to be used in large uninterrupted areas creating consistent attractive facades. The flexibility in choice of NSG Group products allows the designer to control every aspect of the performance from thermal to solar considerations and ultimately the design statement for the building.

Who is Mestral Sdn Bhd?

Check your email! Unlock the pinnacle of architectural excellence with Mestral Sdn Bhd, Malaysia's leading specialist in glass, stainless steel, and aluminium facade works. As trusted contractors, we deliver precision-crafted solutions that redefine skylines. Elevate your project today.

What is the U-value of a double glazing unit?

The insulation value, commonly referred to as the U-value, is dependent on the configuration this type of glass includes – thickness and spacer width. Double glazing units incorporating solar control products such as Low-E, Soft-coated Low-E and reflective glass will significantly reduce:.

What is a curtain wall system?

Its specialty encompasses state of the art façade system such as unitized curtain wall which has much better performance in term of structural, air and water defense as well as ease and safe site installation methodology.
