Market solar module prices

Overview

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends and solar panel costs with our comprehensive market analysis.

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends and solar panel costs with our comprehensive market analysis.

Weekly spot price report for 182mm modules will be based on the 182*182-210mm format from June 2024 onwards due to the slim price gap among varying formats. Prices for Chinese project will be prices for TOPCon modules instead of PERC from April 2024 onwards. BC module prices in China will be added.

The data and analytics software platform's Q2 2025 Solar Module Pricing Insights report indicates a double-digit increase in median module price from February to May 2025 in response to tariff and policy changes. We compiled our platform median solar panel pricing data from more than 95% of the U.S. supply into a free quarterly pricing insights report. This trend data tells the story of the U.S. distributed generation solar module market's last quarter. Example graph from Anza's Q3 2025 Solar Module Pricing.

Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main technologies available on the market. Since 2009, pvXchange has provided a unique price index for the European market, which has become an invaluable.

Note: Data is expressed in constant 2024 US\$ per watt.

OurWorldinData.org/energy | CC BY IRENA presents solar photovoltaic module prices for a number of different technologies. Here we use the average yearly

price for technologies 'Thin film a-Si/u-Si or Global Price Index (from Q4 2013)'. This.

Sources 3 and 4 discuss price indices from pvXchange and EnergyBin. pvXchange's data shows prices per watt in Europe, with a slight dip in May 2025. EnergyBin's index indicates that new modules don't lose value much unless outdated, with prices influenced by market conditions and brand. 5 from. How much does a resale solar module cost?

For example, N-Type modules by REC listed for resale in May and July pushed up weighted average prices to \$0.411 and \$0.460 respectively. P-Type modules in September increased to \$0.311 as modules by Sirius PV, Solar4America, and Panasonic were remarketed. The same price increase was present in P-Type Bifacials for the month of December.

What is the PV module price index?

The PV Module Price Index tracks wholesale pricing and supply of crystalline-silicon modules that have fallen out of traditional distribution channels, and as a result are listed for resale on the EnergyBin exchange.

Are solar modules still in a state of negotiation?

In recent times, the price of solar cells on the cost side has been adjusted, enhancing the cost support for modules. However, the demand-side installations continue to decline, and overseas stockpiling has also largely come to an end. It is expected that module prices will remain in a state of negotiation in the near term.

Do PV modules lose resale value?

For historical secondary market PV module pricing from 2020 through 2023, download the 2023 PV Module Price Index from EnergyBin's Resources portal. Overall, the price index shows that new PV modules don't tend to lose resale value in the U.S. secondary market unless their technology is older, such as Legacy POLY modules.

How much do solar panels cost in Europe?

While Germany promotes rooftops and balcony applications, Italy focuses on smaller projects and Eastern Europe drives on bigger size solar installations. Average EXW prices from distributors for residential solar panels are reported between €0.125/W and €0.100/W, depending on the volumes.

How much does a resale module cost?

Prices jumped each time “Made in America” modules, whether P-Type or N-Type, were introduced into the mix. For example, N-Type modules by REC listed for resale in May and July pushed up weighted average prices to \$0.411 and \$0.460 respectively.

The data in the Q2 report represents median distributed generation (DG) list prices from over 35 module suppliers participating in its platform, which Anza reports captures over 95% of the U.S. module supply.

Solar (photovoltaic) panel prices This data is expressed in US dollars per watt, adjusted for inflation.

Through detailed survey cross-survey of data from major suppliers and procurement parties, Green Energy Research is able to provide an accurate weekly report on ...

In a new weekly update for pv magazine, OPIS, a Dow Jones company, provides a quick look at the main price trends in the global PV industry.

Learn about photovoltaic panel price trends and solar panel costs with our comprehensive market analysis.

Access Anza's free quarterly PV panel price insights report for pricing data from more than 95% of the U.S. module supply.

Futures prices fluctuated, with the SI2512 contract hitting a low of 8,975 yuan/mt and closing at 8,980 yuan/mt at the end of the session, unchanged from the previous day. Operating rates of silicon enterprises diverged ...

Exploring solar PV module price trends? Discover why monocrystalline panels dominate 2024 markets, Amazon's off-grid challenges, and cost-reduction strategies. Click to ...

Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main technologies available on

the market.

View pricing and availability of c-Si solar panels listed for resale in the secondary market. The 2024 PV Module Price Index is presented by EnergyBin.

The data in the Q2 report represents median distributed generation (DG) list prices from over 35 module suppliers participating in its platform, which Anza reports captures over ...
