# Montenegro energy storage exports

## Overview

---

Electricity has become Montenegro's most important strategic product as its exports are worth around 4% of the estimated gross domestic product (GDP) for this year, according to data from the Statistical Office of Montenegro - Monstat, daily newspaper Vijesti reported.

Electricity has become Montenegro's most important strategic product as its exports are worth around 4% of the estimated gross domestic product (GDP) for this year, according to data from the Statistical Office of Montenegro - Monstat, daily newspaper Vijesti reported.

Montenegro's electricity exports reached EUR 190 million over the period January-October 2023 or 35% of the total, led by deliveries to Bosnia and Herzegovina. Electricity has become Montenegro's most important strategic product as its exports are worth around 4% of the estimated gross domestic.

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country. Some of these energy sources are used directly while most are transformed into fuels or.

The energy sector of Montenegro is small, with only 396,000 customers and overall demand of approximately 3,000 gigawatt hours (GWh) annually. Electricity production in Montenegro for 2022 totaled 2,731 GWh, which is 13.6 percent less than in 2021. Most of the electricity in Montenegro is produced.

of capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the world at a height of 100m. The bar chart shows the distribution of the country's land area in each of these classes compared to the.

A tiny country in Southeastern Europe with a name meaning Black Mountain in the official Montenegrin language, Montenegro shipped US\$722.5 million worth of exported products around the world in 2023. That dollar amount reflects a 73.9% increase from 5 years earlier in 2019 when Montenegro's

exports.

The Balkan nation has successfully distributed its electrical energy across various European countries, with Bosnia and Herzegovina topping the list at €50 million, followed closely by Serbia and Slovenia at €42 million each. Montenegro's Primary production of electricity in Montenegro in 2021 was. What are Montenegro's most valuable exports?

Montenegro's top 5 most valuable exports are electrical energy, unwrought aluminum, medication mixes, sawn wood then processed petroleum oils. Collectively, that group of major exports generated over half (55.9%) of overall Montenegrin shipments by value during 2023.

Can Montenegro produce oil and gas?

Montenegro does not have the necessary technology or experience to produce oil or gas. Additionally, successful energy exploration must consider the environmental impact of operations, as coastal tourism is a significant contributor to the country's revenues.

Why is Montenegro a strong exporter of aluminum?

Montenegro has highly positive net exports in the international trade of aluminum. In turn, these cashflows indicate Montenegro's strong competitive advantages under the ores, slag and ash category for aluminum ores and concentrates as well as under the aluminum product category.

Where is electricity produced in Montenegro?

The majority of electricity in Montenegro is primarily produced at the Pljevlja coal-fired Thermal Power Plant and the Perucica and Piva Hydropower Plants. The core activities of the majority state-owned Electrical Power Company of Montenegro (EPCG) are electricity generation, transmission, distribution, and supply.

What is the energy development strategy of Montenegro?

The Energy Development Strategy of Montenegro sets out objectives and defines mechanisms for the transition from the current energy system to a safe, competitive and environmentally acceptable energy paradigm by 2025. It also provides guidelines for.

How does Montenegro utilize its hydro power?

Montenegro currently uses only approximately 20 percent of its hydro power potential. To fully develop this sector, Montenegro needs to upgrade its transmission and distribution network. The most important development project in the transmission system was the construction of an underwater electricity cable to transport the power to and from Italy. Montenegro will need to continue investing in its hydro power infrastructure to increase its usage and export capabilities.
