New Electric Energy Storage

New Electric Energy Storage

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...

Battery energy storage will be increasingly necessary to store power from renewable energy, like wind and solar, over the coming years to create a more reliable electric grid that delivers clean ...

By storing excess energy during demand lulls and discharging it as electricity during demand peaks, energy storage may cost-effectively lower consumers' utility bills, relieve stress on the ...

With nearly \$2B in approved incentives, the programs will stimulate expansive energy storage growth state-wide and further drive the State towards achieving its goal of 6 GW of energy storage deployed by ...

Form Energy's project will be the first demonstration of its technology in New York and the only multi-day battery storage project in the state.

This analysis supplements prior studies and evaluates the extent to which diverse types of emerging long-duration energy storage (LDES) and multi-day energy storage (MDS) ...

Today New York Governor Kathy Hochul announced that the New York State Public Service Commission has approved a new framework for the state to achieve a nation ...

Adding bulk energy storage to New York's grid will lower costs, optimize the generation and transmission of power, enhance energy grid infrastructure, and ensure the ...

One of the country's largest battery energy storage sites is about to be built on Staten Island, but families say by the time they learned of the plan, it was already a done deal.

Affordable and dependable energy for all New Yorkers. Energy storage is a smart and reliable technology that helps modernize New York's electric grid, helping to make the grid more ...

With nearly \$2B in approved incentives, the programs will stimulate expansive energy storage growth state-wide and further drive the State towards achieving its goal of 6 ...
