

PDEOZE PowerContainer

New Zealand solar panel processing manufacturer

Overview

Who are NZ solar installers?

Trusted by NZ installers. We supply premium solar panels, inverters, batteries, cables, and mounting systems — all in stock locally for fast delivery. Our global brand partnerships mean proven performance and reliability. Expect sharp pricing, responsive service, and tech you can trust — so your installs are faster, easier, and more profitable.

How has technology changed in the solar industry?

ABOUT US Technology within the solar industry has evolved significantly over recent years, making panels more efficient and affordable. Whereas the standard panel output used to be 250 Watts per panel, the standard is now 330 Watts with the physical dimensions only having increased marginally.

Which brand of solar panels do you recommend?

Our preferred brand is Trina Solar which is Tier 1, and among the largest solar manufacturers in the industry with a proven track record and a culture of continual technological improvement. In most instances we offer the standard 330W panels but in a commercial setting the larger 440W modules may be more appropriate.
