On EnergySage, Pytes USA Energy offers some of the most affordable batteries at about \$651/kWh. You'll typically pay the most for Enphase batteries, which cost about \$1,510/kWh. Cost of top 10 battery brands.

How much does a battery system cost?

For a typical \$15,500 battery system, that's the difference between saving \$4,650 this year versus paying full price. Your state and utility can make an even bigger difference in your final costs.

When should a battery be replaced?

If battery appears to have an open cell, test and replace as needed. Replace hardware as necessary. Normal behavior; no action necessary. Test and replace battery as necessary. A shorted cell may contribute to thermal runaway. Upon replacement of a battery, all interconnect hardware should be replaced at the same time.

How often should a Northstar NSB blue+ battery be charged?

The NorthStar NSB BLUE+® batteries must be given a freshening charge every 24 months when stored at 77°F (25°C). If stored in higher temperatures, the charge should be more often. Battery capacity is given in ampere-hours or amp-hours (Ah). This is a current draw which is multiplied by the duration of current flow.
