Nordic New Energy Storage Power

Overview

What is the largest battery energy storage project in the Nordics?

SEB Nordic Energy's portfolio company, Locus Energy, in collaboration with Ingrid Capacity, will build the largest battery energy storage project in the Nordics. The project will add 70 MW/140 MWh of storage capacity to SEB Nordic Energy's Finnish portfolio, which already includes wind and hydropower.

What is the largest energy storage investment in the Nordics?

"It is a great honor to inaugurate the largest energy storage investment in the Nordics, with 211 MW now connected to the power grid. "Thanks to the efforts of Ingrid Capacity and BW ESS, we are reducing grid congestion and enabling increased power production."

How much storage capacity does Seb Nordic energy have?

The project will add 70 MW/140 MWh of storage capacity to SEB Nordic Energy's Finnish portfolio, which already includes wind and hydropower. Located in Nivala Municipality in Finland's Ostrobothnia region, the project is expected to be completed in 2026.

Who oversees the connection to the Nordic power grid?

The connection to the grid was overseen at the time by the Swedish minister for climate and the environment, Romina Pourmokhtari. Among her comments at the ceremony, Pourmokhtari said: "It is a great honor to inaugurate the largest energy storage investment in the Nordics, with 211 MW now connected to the power grid.

Does Seb Nordic energy have a pan-Nordic IPP?

"SEB Nordic Energy continues to make significant investments in Sweden, Norway, and Finland, developing a pan-Nordic IPP* for renewable energy.

How is digitalisation transforming the Nordic power sector?

Digitalisation is transforming the Nordic power sector, enabling smarter, more efficient, and more resilient energy systems. Advanced digital tools are being deployed across the value chain, from generation and grid operations to market platforms and customer interfaces, enhancing transparency, automation, and responsiveness.

Advanced digital tools are being deployed across the value chain, from generation and grid operations to market platforms and customer interfaces, enhancing transparency, automation, and responsiveness.

The Nordic region benefits from large hydro reservoirs that provide excellent and cost-

effective energy storage options, which are already being efficiently utilised.

Sweden's largest energy storage investment, totaling 211 MW, goes live, combining 14 sites. 14 large-scale battery storage systems (BESS) have come online in ...

International developer and IPP Nordic Solar has entered the BESS market with a 10MWh project on home soil, in Denmark. The BESS will be in Borup in the municipality of ...

Merus Power has brought online the first grid-forming (GFM) battery energy storage system (BESS) in the Nordic countries for its Swiss customer, Alpiq. The 30 MW / 36 MWh ...

The project will add 70 MW/140 MWh of storage capacity to SEB Nordic Energy's Finnish portfolio, which already includes wind and hydropower. Located in Nivala Municipality ...

From advanced storage solutions to nuclear innovation, learn how technological breakthroughs are paving the way for a more flexible, efficient and sustainable energy future.

BOS Power and HiTHIUM sign a 3GWh battery energy storage agreement to support renewable projects across the Nordic region, marking a significant step in sustainable ...

The Nordic region is at the forefront of the global energy transition, with grids increasingly powered by renewable sources. This creates a significant demand for large-scale energy ...

HiTHIUM, a global leader in long-duration energy storage technology, has signed a multi-year supply agreement (MSA) with Bertel O. Steen Power Solutions (BOS Power) to ...

International developer and IPP Nordic Solar has entered the BESS market with a 10MWh

project on home soil, in Denmark. The BESS will be in Borup in the municipality of Hillerod on Zealand and will be the ...

As the Nordic countries push forward with rapid electrification and record-breaking renewable energy development, a new structural necessity is emerging in the energy system: ...

HiTHIUM, a global leader in long-duration energy storage technology, has signed a multi-year supply agreement (MSA) with Bertel O. Steen Power Solutions (BOS Power) to ...

BOS Power and HiTHIUM sign a 3GWh battery energy storage agreement to support renewable projects across the Nordic region, marking a significant step in sustainable energy infrastructure.
