PV Energy Storage Subsidy 2025

Overview

These two subsidy schemes, now under legislative review, include PLN 4 billion (MF) and, respectively, €200 million (RRP) budgets to aid businesses investing in lithium-ion technology energy storage and grid infrastructure, strengthening the country's energy system. Why did the Dutch government grant €100 million to solar PV projects?

Image for representation purposes only. The Dutch government recently announced €100 million in subsidies for the development and integration of battery storage in solar PV projects covering about 160-330 MW for 2025, in response to emerging challenges related to grid constraints and renewable integration in the country.

Why does Germany need a solar-plus-storage subsidy?

That compares to the effective 100% requirement that solar-plus-storage projects used to need in order to qualify for an investment tax credit (ITC) in the US, and still do for Germany's Innovation Tender. The subsidy is needed because BESS co-located with PV are 'not profitable', the government said.

How much money does the Netherlands spend on battery energy storage?

Netherlands' climate minister has allocated €100 million in subsidies to the deployment of battery energy storage system (BESS) technology.

Will the Netherlands support battery storage in solar PV projects?

Netherlands recently announced €100 million in subsidies for the development and integration of battery storage in solar PV projects covering about 160-330 MW for 2025, in response to emerging challenges related to grid constraints and renewable integration in the country.

How much does a kWh subsidy cost?

The initial estimate for the subsidy is €0.14-29 per kWh of energy discharged. Independent research and consultancy organisation CE Delft has been heavily

involved in the analysis of the scheme until now.

What is a €416 million subsidy?

The funds are part of a €416 million subsidy program announced last year to alleviate grid congestion. The authorities in the Netherlands have allocated €100 million in subsidies to the deployment of battery storage with solar projects for next year, as the country continues to struggle with a lack of power flexibility and grid limitations.
