Price of secondary shipment of solar modules

Overview

Secondary market modules traded on EnergyBin traded at \$0.261 per watt for all black modules, high efficiency modules fetched a price of \$0.376 per watt, mainstream modules \$0.246 per watt, low-cost modules \$0.199 per watt, and used modules averaged \$0.095 per watt.

Secondary market modules traded on EnergyBin traded at \$0.261 per watt for all black modules, high efficiency modules fetched a price of \$0.376 per watt, mainstream modules \$0.246 per watt, low-cost modules \$0.199 per watt, and used modules averaged \$0.095 per watt.

The PV Module Price Index tracks wholesale pricing and supply of crystalline-silicon modules that have fallen out of traditional distribution channels, and as a result are listed for resale on the EnergyBin exchange. For the fourth year, the price index findings shed light on the importance of a.

Today EnergyBin announced the release of its fourth annual “ PV Module Price Index for the Secondary Solar Market ” report. The price index tracks wholesale pricing and supply of crystalline-silicon (c-Si) modules that have fallen out of traditional distribution channels, and as a result are listed.

Today EnergyBin announced the release of their fourth annual (2024) PV Module Price Index for the Secondary Solar Market report. The price index tracks wholesale pricing and supply of crystalline-silicon (c-Si) modules that have fallen out of traditional distribution channels, and as a result are.

IRENA presents solar photovoltaic module prices for a number of different technologies. Here we use the average yearly price for technologies 'Thin film a-Si/u-Si or Global Price Index (from Q4 2013)'. This data is expressed in US dollars per watt, adjusted for inflation. IRENA (2025); Nemet.

Prices for Chinese project will be prices for TOPCon modules instead of PERC from April 2024 onwards. BC module prices in China will be added and split into ground-mounted and C&I segments from June 2025. Weekly spot price report for 182mm modules will be based on the 182*182-210mm format from June.

EnergyBin maintains a business-to-business solar equipment commerce platform, selling secondary-market components for goods that are not sold via primary distribution channels. In its recent report, “PV Module Price Index for the Secondary Market”, the company noted an increase in secondary market. What is the PV module price index?

The PV Module Price Index tracks wholesale pricing and supply of crystalline-silicon modules that have fallen out of traditional distribution channels, and as a result are listed for resale on the EnergyBin exchange.

How much does a resale solar module cost?

For example, N-Type modules by REC listed for resale in May and July pushed up weighted average prices to \$0.411 and \$0.460 respectively. P-Type modules in September increased to \$0.311 as modules by Sirius PV, Solar4America, and Panasonic were remarketed. The same price increase was present in P-Type Bifacials for the month of December.

Do PV modules lose resale value?

For historical secondary market PV module pricing from 2020 through 2023, download the 2023 PV Module Price Index from EnergyBin’s Resources portal. Overall, the price index shows that new PV modules don’t tend to lose resale value in the U.S. secondary market unless their technology is older, such as Legacy POLY modules.

When will BC module prices be added in Eurpoe?

In Eurpoe, the public pricing for BC modules (residential and C&I) will be added from June 2025. InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends and solar panel costs with our comprehensive market analysis.

How much does energybin cost?

However, prices on EnergyBin ranged from \$0.140 (Vikram Solar) to \$0.360 (QCells). These are prime examples of the fluctuations within of the secondary market with respect to pricing and availability. Such price fluctuations put pressure on wholesale sellers to do their research and practice transparency by listing prices online.

How much does a resale module cost?

Prices jumped each time “Made in America” modules, whether P-Type or N-Type, were introduced into the mix. For example, N-Type modules by REC listed for resale in May and July pushed up weighted average prices to \$0.411 and \$0.460 respectively.

Today EnergyBin announced the release of their fourth annual (2024) PV Module Price Index for the Secondary Solar Market report.

The global PV industry is expected to install 592 gigawatts of modules this year, up 33% from the boom year of 2023. Low prices for modules are stimulating demand in new ...

U.S.: The spot price for TOPCon utility-scale modules DDP US was stable this week at \$0.279/W. The spot price for Mono PERC 400 W modules EXW held at \$0.303/W. On ...

Average EXW prices from distributors for residential solar panels are reported between EUR0.125/W and EUR0.100/W, depending on the volumes.

The price index tracks wholesale pricing and supply of crystalline-silicon (c-Si) modules that have fallen out of traditional distribution channels, and as a result are listed for resale on the EnergyBin exchange.

Although solar growth will slow from this year due to higher base period, grid issue, and localization trend, the market outlook remains positive as module prices plummeted, ...

Transporting solar energy panels requires green energy logistics expertise and extensive understanding of the solar energy industry. DSV is a world-leader in renewable energy logistics and has the solutions you need to ...

Data source: U.S. Energy Information Administration, Form EIA-63B, Annual Photovoltaic Module Shipments Report Note: Monthly data for 2024 are based on a subset of the largest ...

All of this will lead to challenges with modules price reduction", she said. Also

interesting: "The drop in prices is causing the industry in Europe problems" Jinko Solar, which last year topped global ...

Prices of solar modules are at record lows, and supply of components is plentiful.

The top 10 PV module manufacturers shipped a total of 226 GW, with the leading four companies contributing to 63% of this volume, highlighting a growing oligopoly in the solar ...

Canadian Solar has been in the top 10 in global solar module shipments for 14 consecutive years, ranking second twice in 2015 and 2017, and in the top five globally for 12 consecutive years. However, ...

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price ...

Shipment volumes of the list of manufacturers increased significantly, up by 78% YoY. There is a clear distinction among module makers, with top-ranked companies remained ...

Longi Solar temporarily halted shipments of certain products, while REC reduced its product range to the Alpha series.

Table 6. Source and disposition of photovoltaic module shipments U.S. shipments and sales to the original equipment manufacturer (OEM) for resale and export shipments are not published ...

EnergyBin, an exchange platform for secondary market solar panels in the United States, released its annual pricing and trends report. The company facilitates direct ...

Module design with strong impact on container utilization and transport costs Transport costs (EUR/module) are highest for 132x G12 module and lowest for 144x M10 module

Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main technologies available on the market.

The 2023 PV module price index presented by EnergyBin tracks crystalline-silicon modules traded within the secondary solar market. Download the report.

In 2025, GCL System Integration, DAS Solar, Risen Energy, Yingli Solar, and DMEGC may enter a fierce competition, with their rankings expected to adjust. Enterprises with shipments below 6 GW may need to ...
