Qatar Forest Solar Power System

Overview

Located 80 km west of Doha, the Al Kharsaah plant stands as Qatar's first large-scale solar power venture. Developed through a collaboration between TotalEnergies, Marubeni, and Siraj Energy, this project beautifully marries technological innovation with environmental stewardship.

Qatar Forest Solar Power System

The plant covers 1,000 hectares (which equals approximately 1,400 soccer fields) and features two million bifacial solar modules mounted on trackers for achieving substantial ...

The plant covers 1,000 hectares (which equals approximately 1,400 soccer fields) and features two million bifacial solar modules mounted on trackers for achieving substantial power gains.

Qatar boasts the ideal conditions for developing solar energy with its exceptional sunshine and vast unoccupied spaces. This is where the Al Kharsaah solar power plant, developed by TotalEnergies and its ...

The Al Kharsaah solar power plant covers 1,000 hectares (the equivalent of approximately 1,400 soccer fields) and features two million bifacial solar modules mounted on trackers for achieving substantial ...

With a production capacity of 800 megawatts across 10sq km and equipped with more than 1.8mn solar panels, the plant supplies electricity to roughly 60,000 homes. It literally ...

As a Middle Eastern country, Qatar was already a perfect place for a large-scale solar power plant, but what about the expertise needed to develop and operate it effectively?

It commenced construction in July 2020 and was completed in October 2022. The project can provide Qatar with approximately 1.8 billion kilowatt-hours of clean electricity annually and ...

This landmark initiative not only underscores Qatar's commitment to renewable energy but also sets a new standard for solar power generation in the region.

The plant will have solar trackers and heat-proof inverters to ensure it can keep generating electricity efficiently, and really making use of Qatar's hot summer days.

Qatar boasts the ideal conditions for developing solar energy with its exceptional sunshine and vast unoccupied spaces. This is where the Al Kharsaah solar power plant, ...

Once completed, it will be among the biggest solar plants in the world, significantly advancing Qatar's clean energy transition.
