Romania New Energy Storage Project West

Overview

What is Romania's largest battery project?

Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date. The company will build a 400 MWh facility in Florești, Cluj county, which is expected to be operational by the end of 2025.

How is Romania transforming the European energy landscape?

The investment wave, supported by key regulatory changes, is elevating Romania in the European energy landscape. Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date.

What is Romania's energy storage requirement?

Minister of Energy Sebastian Burduja reportedly declared at a conference that Romania's storage requirement is 4,000MWh, and that half would be covered by BESS and half by pumped hydro energy storage (PHES) technology.

How many energy storage systems will Nova have in 2028?

Nova also suggested that by 2028, the company plans to install energy storage systems of up to 600 MW / 1,200 MWh overall, supporting its gas power plants. Meanwhile, technology company Visual Fan announced this week that it has secured two separate contracts for a combined 182 MWh of battery energy storage system (BESS) projects.

Does Romania have a double taxation of stored electricity?

Romania's National Energy Regulatory Authority (ANRE) recently eliminated the double taxation of stored electricity. The new rules exempt electricity stored and then reinjected into the grid from several tariffs, removing a significant financial barrier for investors.

Romania New Energy Storage Project West

Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date. The company will build a 400 MWh facility in Floresti, Cluj county, which is expected to be operational by the end of 2025.

A 204MW battery energy storage system (BESS) project in Romania can progress after the government said it did not need to go through an environmental impact assessment

...

Bucharest / Stockholm, 21 October 2025 - Repono AB, the Sweden-based pan-European energy storage operator, has completed the acquisition of a 202 MW / 404 MWh (2.0 h) standalone ...

Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date. The company ...

Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date. The company will build a 400 MWh facility in ...

The European Bank for Reconstruction and Development (EBRD) is considering lending EUR 50 million (USD 58.1m) to support a battery energy storage system (BESS) ...

A 204MW battery energy storage system (BESS) project in Romania can progress after the government said it did not need to go through an environmental impact assessment (EIA).

In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or building standalone energy storage facilities. The group includes ...

In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or building standalone energy storage facilities. ...

Romania is another European country planning to significantly expand its investments in energy storage. According to the Minister of Energy, at least 2.5 GW of battery ...

In an accelerated wave of investments, companies in Romania are combining battery

energy storage systems (BESS) with solar, hydro or wind energy, or building independent storage facilities. The list ...

Bucharest / Stockholm, 21 October 2025 - Repono AB, the Sweden-based pan-European energy storage operator, has completed the acquisition of a 202 MW / 404 MWh (2.0 h) standalone ...

In an accelerated wave of investments, companies in Romania are combining battery energy storage systems (BESS) with solar, hydro or wind energy, or building ...

Once completed, this investment will double Romania's current total energy storage capacity, directly contributing to the national grid stability and the efficient integration of ...

Nova Power & Gas, a local energy company part of the E-INFRA group, has confirmed its investment in the largest battery energy storage facility in Romania. This ...

Once completed, this investment will double Romania's current total energy storage capacity, directly contributing to the national grid stability and the efficient integration of renewable sources.

Romania is another European country planning to significantly expand its investments in energy storage. According to the Minister of Energy, at least 2.5 GW of battery ...

Trina Storage is set to supply a 65MWh battery energy storage system (BESS) for a new project in Romania, marking its first deployment in the country. The initiative, located in ...
