Romania distributed solar energy storage

Overview

Romania aims to exponentially grow its energy storage fleet over the next couple of years, as it works on its plan to deliver 36% of the nation's energy to come from renewables by 2030, with 8.3 GW of solar and 7.6 GW of wind, and phase out coal by 2032. Does Romania have a battery energy storage plan?

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via its National Recovery and Resilience Plan. A utility-scale solar-plus-storage site in the country's northwest has flipped the switch.

How much money has Romania allocated for energy storage projects?

Romania has allocated EUR 80 million under its National Recovery and Resilience Plan (PNRR) for energy storage projects, which is expected to result in contracts for a total of 1.8 GW of capacity, according to Burduja. Romania has earmarked EUR 380 million to support energy storage projects.

Does Romania have a solar PV project in 2023?

Overview of solar PV developments Following a period of lull, Romania has achieved in 2023 a significant milestone in its renewable energy journey - over 1 GW of new solar capacity installed in one year between distributed generation and utility scale projects.

What is Enery doing in Romania?

This week, Vienna-based Enery has commissioned a major solar and storage site in northwestern Romania. The project consists of a 51.4 MW PV plant and and a battery energy storage facility of 22 MWh.

How much solar energy does Romania need?

In the context of the European ambitions, Romania would need to aim for 44.4% RES, meaning 11.1 GW of solar - 6.1 GW for utility-scale and 5 GW for rooftop PV1. Drivers for solar growth The last two years have been marked by

significant legislative changes that underpinned the development of the Romanian PV sector.

How will Romania grow its energy storage fleet?

Romania aims to exponentially grow its energy storage fleet over the next couple of years, as it works on its plan to deliver 36% of the nation's energy to come from renewables by 2030, with 8.3 GW of solar and 7.6 GW of wind, and phase out coal by 2032.

Nov 1, 2025 · Greenvolt Next's Role in Romania energy storage Transition Greenvolt Next, a key division of the Greenvolt Group, is a leader in distributed solar energy generation and ...

Mar 5, 2024 · Overview of solar PV developments Following a period of lull, Romania has achieved in 2023 a significant milestone in its renewable energy journey - over 1 GW of new ...

Jan 31, 2025 · The Romanian Photovoltaic Industry Association (RPIA) says Romania installed 1.7 GW of solar in 2024, as increased funding, higher renewable targets, and a streamlined permitting process drove

Sep 24, 2025 · Econergy plans to equip every connected and ready-to-connect solar project in Romania with electricity storage capacity. The aim is to consolidate and expand its position in the Romanian renewable energy ...

Oct 24, 2024 · In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via the National Recovery and Resilience Plan. A utility-scale solar-plus-storage site in northwest of the ...

Jul 18, 2024 · Romania expects its overall energy storage to amount to at least 2.5 GW in operating power at the end of 2025, and to expand to as much as 5 GW a year later, local media reported, citing Minister of Energy ...

Jan 31, 2025 · The Romanian Photovoltaic Industry Association (RPIA) says Romania installed 1.7 GW of solar in 2024, as increased funding, higher renewable targets, and a streamlined ...

Oct 24, 2024 · In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via the National Recovery and Resilience Plan. A utility-scale solar ...

Mar 12, 2024 · To accelerate the energy transition, taking into account the Fit for 55 package of proposals and complementing actions on energy security of supply and energy storage, the ...

Can storage technologies improve energy security in Romania? Such enhanced legislation is needed for implementing the Romanian National Energy and Climate Plan (NECP), which lists ...

Jul 18, 2024 · Romania expects its overall energy storage to amount to at least 2.5 GW in operating power at the end of 2025, and to expand to as much as 5 GW a year later, local ...

The Romanian Ministry of Energy has signed multiple contracts under the National Recovery and Resilience Plan (PNRR) to enhance energy storage and solar panel production. Five ...

Sep 24, 2025 · Econergy plans to equip every connected and ready-to-connect solar project in Romania with electricity storage capacity. The aim is to consolidate and expand its position in ...

Mar 4, 2022 · Based on its renewable energy potential and considering the national energy sector's current characteristics - generation assets, interconnections, market design, ...
