The Government of Samoa through the Ministry of Natural Resources and Environment (MNRE) proudly announces the official opening of Samoa's first Electric Vehicle (EV) Solar Charging Station on July 21, 2024 at the Friendship Park, Matagalalua. This groundbreaking facility marks a significant step.

The Government of Samoa yesterday marked a significant step in advancing climate-resilient infrastructure with the official commissioning of the Central Electric Vehicle (EV) Charging Station Hub at Tuanaimato, and the formal handover of 20 Plug-in Hybrid Electric Vehicles (PHEVs) under the Climate.

ARE Member Enviroearth has completed the installation of six electric vehicle (EV) charging stations in Apia, Samoa, with a trusted local partner. The project combines hybrid and renewable energy systems to support sustainable mobility and strengthen climate resilience in island states. Each.

Pago Pago, American Samoa— Samoa's first electric vehicle charging station uses an innovative design that ensures electric vehicles are charged primarily using solar energy, with battery storage as a backup and grid power as a last resort. This setup ensures continuous and sustainable operation.

Samoa New Energy Charging Station

ARE Member Enviroearth has completed the installation of six electric vehicle (EV) charging stations in Apia, Samoa, with a trusted local partner. The project combines hybrid ...

The establishment of the EV Charging Station is expected to serve as a model for future developments in renewable energy and sustainable transportation in Samoa.

The innovative design ensures that the EV's are primarily charged using solar energy with battery storage as a backup and grid electricity as a last resort. This setup ...

The Government of Samoa through the Ministry of Natural Resources and Environment (MNRE) proudly announces the official opening of Samoa's first Electric Vehicle (EV) Solar Charging ...

The EV charging hub, located behind the government bowser at Tuanaimato, features five DC (Direct Current) fast chargers and two AC (Alternating Current) chargers, supported by a 1000 kVA transformer station.

The project is in line with Samoa's commitment to achieve a 26% reduction in greenhouse gas emissions by 2030. The innovative design ensures that the EV is charged ...

The establishment of the EV Charging Station is expected to serve as a model for future developments in renewable energy and sustainable transportation in Samoa. It aims to inspire ...

In a substantial step toward sustainable transportation for Samoa, the UNDP Samoa Multi-Country Office and BMS/Information & Technology Management (ITM) will ...

The establishment of the EV Charging Station is expected to serve as a model for future developments in renewable energy and sustainable transportation in Samoa.

The new Central EV Charging Hub, now operational at Tuanaimato, features five 60-kilowatt DC fast chargers, each equipped with dual ports, enabling simultaneous charging of up to ten ...

The project supports Samoa's national climate commitments and long-term transition to low-carbon transport. The new facility includes five DC fast chargers, each with a ...

The EV charging hub, located behind the government bowser at Tuanaimato, features five DC (Direct Current) fast chargers and two AC (Alternating Current) chargers, ...

The project supports Samoa's national climate commitments and long-term transition to low-carbon transport. The new facility includes five DC fast chargers, each with a 60-kilowatt capacity and dual charging ...
